# What is Parents Payment System in Bromcom?

The Parents Payment system in Bromcom helps schools effectively manage their payments between parents and guardians using our web based parent portal – My Child at School (MCAS). This feature is also available on our Parent App that is on Android and Apple devices.

You can make payments for Clubs, Trips, Wraparound before and after-school care, Dinner Money and School Shop, with multiple settings for payments and purchases. This feature rich online secure process gives schools total control over their cashless system. Even if not fully cashless in school, MCAS processes allow a school to manage and create orders manually.

Parents can use MCAS for all their children that are within one school, they are able to easily manage all their school payments needs.

The Online Payments option includes, but is not restricted to, payments with deposits, instalments, part pay and running balances, as well as the management of a range of payment types, refunds and vouchers, including Paypoint and offline payments directly in school. Parents are kept informed of their balances and can receive reminders when payments are due or overdue. The whole online experience offers the same security as any online payment process and is complemented by in-school management tools. Added to this, MCAS transactions can be linked directly to Bromcom's Finance module, and separate bank accounts added, if required.

# Detailed Specifications
