

Bromcom Computers named as MIS Provider for Isle of Anglesey County Council

Anglesey becomes the sixth of the last eight Welsh councils to select Bromcom, as schools across Wales move away from legacy MIS systems

BROMLEY UK, 23/03/2026 - Bromcom is proud to announce that it has been selected by Isle of Anglesey County Council to provide a cloud-based Management Information System (MIS) across their 44 schools in the region. This partnership marks another significant milestone in Bromcom's growing presence across Wales, and a clear signal of the trust schools and local authorities are placing in the platform.

The move sees Anglesey join a growing movement in Welsh education: replacing legacy systems with a modern, AI-powered platform designed to benefit staff, students, and parents alike. Crucially, the platform supports bilingual access, ensuring both English and Welsh-speaking users can engage with the system freely and easily.

A Forward-Thinking Partnership

"As the Senior Responsible Owner for this programme, I am pleased to confirm Anglesey's commitment to the Bromcom implementation. This transformation is a strategic investment in modern, data driven school information management across the island, and a key step in strengthening how we support pupils, staff and school leaders.

The move to a single, centrally configurable MIS will help us reduce complexity, drive consistency, and improve the quality and timeliness of the data we rely upon for decision making.

This programme is about more than replacing a system – it is about enabling our schools to work more efficiently, ensuring staff have the right tools and training, and delivering a sustainable platform for the future. We look forward to working closely with Bromcom and our schools to deliver a smooth, well supported transition and to realise long term benefits for learners and the wider education system in Anglesey."

Huw Ynyr, Head of Digital, Performance and Modernisation
Isle of Anglesey County Council

Commitment to Innovation and Excellence

"We're thrilled to welcome Isle of Anglesey County Council and their 44 schools into the Bromcom family. This announcement is part of a remarkable shift we're seeing right across Wales. Six of the last eight Welsh councils have now chosen Bromcom, and that's not by chance. It reflects a shared recognition that schools and local authorities deserve a truly integrated, bilingual platform built for the future. We look forward to working closely with the team at Anglesey and making a real difference for their schools, staff, and families."

Notes to Editors

About Bromcom

Bromcom's cloud-based MIS, Finance, and Vision products serve thousands of schools and millions of users across the UK and beyond. From students and families to staff and stakeholders, Bromcom provides intuitive, data-driven tools that enhance education management.

Unlike other systems that rely on additional plug-ins for functionality, Bromcom offers a fully integrated platform where all features are developed in-house. This drives down costs and ensures a smoother, more user-friendly experience for schools.

This win represents Bromcom's latest success in Wales, following Ceredigion, Gwynedd, Rhondda Cynon Taf, Swansea and Wrexham. Bromcom has rapidly established itself as the leading cloud MIS provider in Wales, building strong partnerships with local authorities and schools to drive improvements in education.

About Isle of Anglesey County Council

Isle of Anglesey County Council (Cyngor Sir Ynys Môn) is the local authority for Anglesey in North Wales, serving a community that includes the towns of Holyhead, Llangefni and Beaumaris. For more information, visit anglesey.gov.wales.
