

Bromcom Scotland 

Built for the **future** of Scottish education

Fewer systems to manage, less friction for your staff, and real-time data across your entire estate. Helping schools and authorities to act quickly and with confidence.

Why Scottish LAs Are Talking to Us:

Schools and Local Authorities tell us they're being held back by their current solution. Outdated interfaces, fragmented data, and a system not designed for where education is heading. Every workaround costs time and resource that could be spent on pupils.

Bromcom is a cloud-based MIS trusted by 5,600+ schools across the UK and now we're here in Scotland, working directly with schools and Local Authorities to build something that truly fits.

One system, complete visibility – MIS, finance, assessment, parental engagement, wraparound care, and behaviour in one place. All from one login and no bolt-ons required.

Built for LA oversight – Real-time data across your estate means you see what's happening within all your schools, across a wide range of data points. That's just not possible with an ecosystem of third party software.

Genuinely cloud-based – Local Authority staff, schools, and stakeholders access everything through a web browser or mobile apps.

Proven across the UK – Success stories from our Local Authority partners across the UK reflect our long term commitment to better outcomes for schools, LAs, and the pupils they serve.

"Our internal teams are able to access information on our pupils in real time and put our children first. Making sure that they've got the decision making tools to be proactive rather than reactive."

Scottish Success Story

We're proud to be working with Erskine Waterfront Campus – a flagship Scottish special school, demonstrating how Bromcom supports specialist provision with flexibility and clarity.

"Before Bromcom, we had records distributed across Word and Excel. Opening a child's profile now, I can see everything I need, including daily routines, medical needs, and recent behaviour all in one place. It has been transformational."

Meet Your Scotland Team

Steph Reddington

LA Sales Team Lead

With over 20 years' experience in education, Steph leads Bromcom's Local Authority sales team, focusing on strategic partnerships, regional growth, and long-term digital

Mark Lovick

LA Business Development Manager

Mark has over 30 years' experience working with Local Authorities, supporting schools with MIS and finance. He has chaired LA representative groups and was seconded to the DfE to support the rollout of the School Workforce Census.

Mandie Kirk

LA Business Development Manager

Mandie has over 30 years' experience supporting schools and local authorities with MIS and finance systems, bringing a strong background across Local Authority work, DfE projects, and product management.

Dan Sears

Principal Education Consultant

Previously a Headteacher, Dan has already been actively engaging with several Scottish Local Authorities, building relationships and identifying how Bromcom can meet specific regional needs.

Glen Gair

Scotland Product Manager

As a Scot himself, Glen brings strong local insight and is leading Bromcom's product expansion into Scotland – engaging directly with Local Authorities to ensure our MIS is built for Scottish education, not simply adapted for it.

Coming Soon: Scotland Roadshow

Scotland's schools and Local Authorities are navigating more complexity than ever. From safeguarding in a digital age to the pressure to do more with less, all while keeping pace with rapidly evolving technology. This spring, we're bringing together school and Local Authority leaders across Scotland for a series of free events designed to tackle those challenges head on.

Joining us will be expert voices from across the education technology space, covering everything from data-driven school improvement and AI in education, to digital safety and what a truly connected school ecosystem looks like in practice. Whether you're deep into your MIS strategy or just starting to think about what the next few years look like for your authority, there'll be something here for you.

Spaces are limited so please register your interest now to secure your place at the event closest to you.

More details and booking information coming soon.

Save the date:

- Edinburgh – Tuesday 12th May
- Glasgow – Wednesday 13th May
- Aberdeen – Tuesday 2nd June
- Inverness – Wednesday 3rd June

Already Engaging Locally

The Team have already been engaging with multiple Local Authorities across Scotland, building early partnerships and gathering insights to ensure Bromcom will deliver real value where it matters most.

Let's Start the Conversation

Whether you'd like to see a demonstration of Bromcom MIS, arrange for some deep dive sessions into specific areas of interest, or would like to get involved in helping to shape the Bromcom Scotland product, we'd love to talk.
